RE: Request for Full Waiver of Lead and Copper Monitoring for Public Water Supplies

I am requesting a full waiver for lead and copper under the Montana Lead and Copper Rule, as described under ARM 17.38.216 (3)(o) [40 CFR 141.88]. Enclosed are the latest analytical results for lead and copper at the designated sampling sites for our facility, showing that the amount of lead and copper available for migration is insignificant. The summary of those results is shown below:

Date Sampled: _____

90th %-ile Lead = _____ (Must be 0.005 mg/L or less)

90th %-ile Copper = _____ (Must be less than 0.65 mg/L)

Sincerely,

Name: _____
